

# CoC NOFO Data Strategy Analysis

## Overview

Is your CoC's HMIS data supporting a competitive CoC application score?

Bitfocus' Professional Services team is prepared to analyze your CoC's collaborative application and provide HMIS strategy recommendations to improve your application score.

We are offering a CoC NOFO Data Strategy Analysis to provide short-, medium-, and long-term recommendations the help CoCs maximize the positive impact of HMIS data.

## Expertise

At Bitfocus, we understand the expertise and capacity challenges related to the CoC NOFO process.

The team's expertise includes:

- In depth knowledge of the CoC application process and scoring elements.
- 5+ Years of CoC application experience at the CoC Lead level.
- Expertise on how federal reporting and other HMIS factors impact CoC application scoring.

## Structure and Cost

This analysis and recommendations project is composed of three phases:

1. Stakeholder engagement
2. Analysis of CoC documentation
3. Recommendations report and presentation

**Data Strategy Analysis Cost per CoC:**  
**\$10,000 to \$30,000**

## What's Included?

- In depth analysis of the CoC's latest collaborative application and scoring summary.
- Stakeholder engagement to understand the CoC's data strengths and areas with potential for improvements.
- Analysis of HMIS system performance data quality.
- Written report and presentation of short-, medium-, and long-term recommendations, specific to your CoC.
